A dense, overlapping pattern of various tropical leaves, including palm fronds and monstera leaves, in shades of green and yellow-green, set against a light background. The leaves are scattered across the entire frame, creating a lush, naturalistic texture.

TECHNICAL DETAILS OF THE SYSTEM

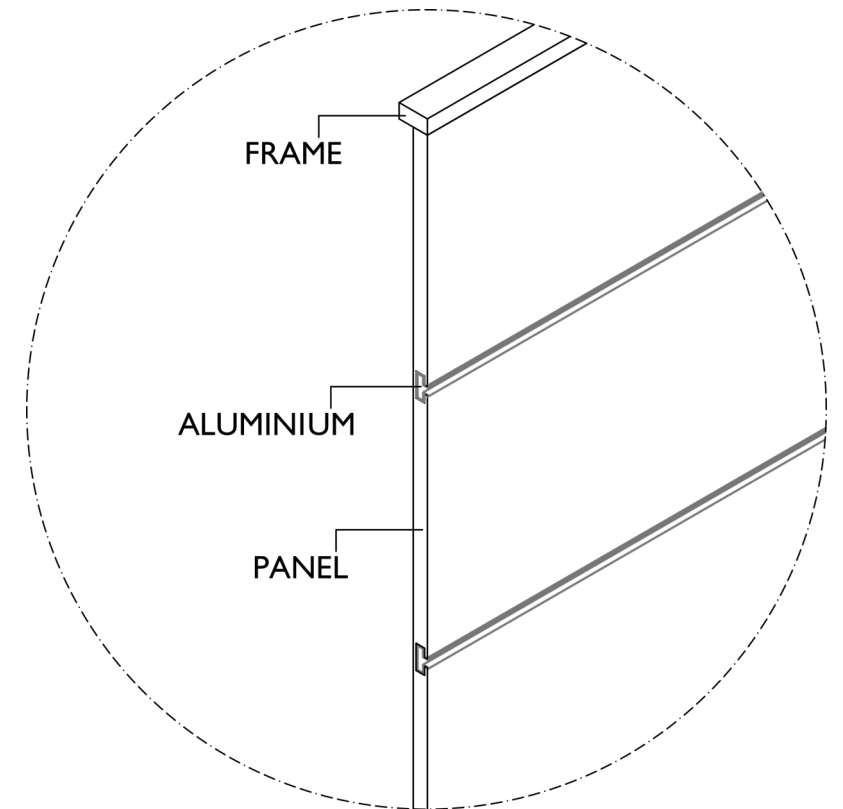

Stay Cool, With Aluminium

Aluminum profiles can be placed on the panel to be used as a background by opening channels at the desired sizes and December. After that, you can create an display unit for your needs and tastes by selecting the appropriate devices for your product group from our merchandise department. You can diversify the design even more by adding applications such as coating and plastering to the wooden surface in the background and you can create the most suitable design for your brand.

- Aluminum Profile
- All Of RAL Colors
